### About Us

The Internal Displacement Monitoring Centre (IDMC) is the leading source of information and analysis on internal displacement worldwide. Since 1998, our role has been recognised and endorsed by United Nations General Assembly resolutions.

For the millions of people displaced within their own country, IDMC plays a unique role as a global monitor and analyst to inform and influence policy and action by governments, UN agencies, donors, international organisations and NGOs.

IDMC is part of the Norwegian Refugee Council (NRC), an independent, non-governmental humanitarian organisation.

For more, visit [About us section](#).
